DETAILED ACTION

Allowable Subject Matter

1. Claims 1-3,5-8,10,12-15,17-18,26 and 30 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The prior art of record neither discloses nor teaches that a liquid crystal display device comprises various elements as claimed, more specifically, as the following:

a reflective polarizer comprising a cholesteric layer and a quarter wave plate arranged at an upper portion of the light control element so that a polarized light transmission axis of the reflective polarizer is adjusted so as to be substantially perpendicular or substantially parallel to a direction of stripes of the light control element; and the light control element comprises an isotropic medium having no birefringence as shown in Fig.5 [claims 1 and 13].

The closest references such as AAPA and Weber disclose that a liquid crystal display device having reflective polarizer to enhance the brightness, but the prior art of record do not discloses that adjusting the polarized transmission axis of the reflective polarizer perpendicular or parallel to the direction of strips of the light control element, and the light control element comprised an isotropic medium having no birefringence as claimed in claims 1 and 13 and as shown in Fig.5.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
